Professional Experience

- 2022 – 2023** **W.C. Bradley** Worked custom Customer Management System. Used Blazorize to create and utilize APIs. Used Azure functions for much of the backend. Used Azure Core in MVC pattern utilizing JQuery. Both projects were utilizing Jira and Scrum development principles.
- 2020 – 2021** **EMetroTech** Created multiple websites for local companies including Attorneys and Auto Repair Shop. Using PHP and MYSQL and Bootstrap to create sites that are Responsive and work across all devices from phone to tablets to laptops and desktops.
- 2018 – 2020** **EZ Logic Data Systems, Farmington Hills, MI .** Worked with a team created pages and reports using ASP.NET 4.5 and Core MVC with VUE and Dapper. Created pages for Customer Service application in ASP.NET using ASP.NET 4.5 and Angular. Merged all of the test plans for the large project utilizing Markdown Monster.
- 2017 – 2018** **Yeti Asset Management, Brooklyn, New York.** Created rental and asset management software using Visual C# and ASP.Net 4.0, Telerik tools, and Bootstrap to create Responsive application on Azure. Barcoding and RFID scanning can be performed from a phone, a tablet, or a desktop computer. The system provides quotes, invoices, and inventory reports.
- 2013 – 2015** **Katanga Mining – Katanga Province, Democratic Republic of Congo**
Application Programmer. Created Metals Accounting System using Telerik ASP.NET Controls. Created SSIS packages to import\export data from SCADA database and StarLIMS database to Metals Accounting System.
- 2005 – 2016** **Arizona Tile Corporation – Tempe, Arizona**
Application Programmer. Created C# with ASP.Net 2.0 Interface to manage Business Objects XI. Redesigned all of their existing Crystal Reports to increase performance and reduce network load. Setup and deployed Crystal Server 10 and Business Objects Server 10 and XI and 3.1. Built an application using C# to connect to Adobe Connect Learning Management System XML web services and send the data to SQL Server. Created a C# ASP.NET intranet reporting system. Created a C# web service and

SQL Server database to support an Adobe Flash Stone and Tile medallion design program. Performed all DBA functions including performance tuning, backup and maintenance plans. Setup transactional replication on a 300 gigabyte database for reporting.

2006 – 2012 Vextrum Studios – Riverdale, GA

Application Programmer. Created multiple websites using PHP. Developed templates and framework using Smarty Template Engine. Worked with multiple web designers. Smarty allowed designers to continue to use WYSIWYG tools and separate design from business logic. Administered many websites using Plesk and Parallels control panel. Managed the MYSQL Databases. Edited the Perl script in Exim send copies of emails to the database and also send SMS messages to the user.

2000 – 2004 Phelps Dodge Corporation – Phoenix, AZ

Application Programmer. Technical Lead for large corporate merger. Setup and deployed interfaces for Labor, Invoices and Journals into the MIMS mining application on HP-UX using Mercator. Created interfaces using Visual Basic. Created Classic ASP reporting system for the MIMS reports. Created DTS packages, Crystal Reports and SQL Functions and Classic portal to support the Star LIMS laboratory management system. Created foreign currency exchange system using Classic ASP VB and SQL Server. Created Molybdenum management system using Classic ASP and SQL Server.

1998 – 2000 SunTrust Service Corporation – Atlanta, Georgia

Application Programmer - Payments Technology. Primary application programming and production support for Fraud and Control Services group. Applications supported include Recon Plus, Autobalance, Fed Reserve Interface processing. Duties include NT Server Administration, SQL Server 2000 Administration. Support and mainframe coding and processing for General Ledger, Deposits, Wholesale Lockbox extracts and interfaces. Maintained Crystal Reports interfaces and report distribution and archive in XPTR. Maintained Recon Plus application server configuration, installed system upgrades and performed database tuning.
